

Ade Shiva Sai

Hyderabad, Telangana | +91-7981633187 | shivasaiade@gmail.com | [GitHub](#) | [LinkedIn](#)

Professional Summary

Enthusiastic and self-motivated Computer Science undergraduate aspiring to build a career in DevOps and Cloud Engineering. Possess hands-on exposure to **AWS, Docker, Kubernetes, Jenkins, GitHub Actions, Terraform, Ansible, Git, Linux, and Python** through academic projects and continuous self-learning. Familiar with **CI/CD pipelines, containerization, infrastructure automation, cloud services, and version control practices**. Strong foundation in problem-solving, networking fundamentals, and software development concepts. Passionate about learning modern DevOps methodologies, automating workflows, and contributing to scalable, reliable, and efficient cloud-based solutions. Seeking an entry-level DevOps Engineer role where I can apply my technical skills, gain industry experience, and grow as a cloud and automation professional.

Education

CMR Technical Campus, Hyderabad | CGPA : 8.3/10

2023 – Present

B.Tech in Computer Science & Engineering

Prathibha Junior College, Hanamkonda | Percentage : 92%

2021 – 2023

State Board of Intermediate

ST Theresa High School, Repellewada | CGPA : 10/10

2021

Secondary School of Education

Projects

Thyroid Disease Classification using machine learning

Python, Flask, REST APIs

- Uses patient data (TSH, T3, T4 levels, age, symptoms) to classify thyroid conditions like hypothyroidism, hyperthyroidism, and normal.
- Applies machine learning algorithms (Logistic Regression, Decision Tree, Random Forest, SVM, Neural Networks) to improve prediction accuracy.
- Helps in early detection, reduces diagnosis time, and supports doctors in making faster clinical decisions.

Automated Road Damage detection using UAV images and deep learning

Python, APIs, JSON

- Uses UAV (drone) images to capture high-resolution road surface data for inspection.
- Applies deep learning models (CNN, YOLO, Faster R-CNN, U-Net) to detect and classify road damages such as cracks, potholes, and surface wear.
- Enables faster, cost-effective, and automated road maintenance monitoring compared to manual inspection methods.

Future You | Future Life simulator

Python, AI, Algorithms

- A life simulation web application that predicts a user's future based on inputs like career choice, habits, skills, savings, and goals.
- Uses AI/ML-based logic and scenario modeling to generate possible future outcomes (career growth, financial status, lifestyle changes).
- Helps users in goal planning, decision-making, and self-improvement by visualizing long-term life consequences.

Technical Skills

- **Cloud:** AWS (EC2, VPC, IAM, EKS, S3, ELB, EKS,RDS and DynamoDB)
- **Containers:** Docker, Kubernetes
- **CI/CD:** Jenkins, GitHub Actions
- **IaC & Automation:** Terraform, Ansible
- **Scripting & OS:** Bash, Linux
- **Tools:** Git
- **Networking:** SSH, CIDR ,Subnets ,OSI layers, HTTP/HTTPS, DNS and Ports
- **Programming Language:** Python

Certifications

- Cisco | Introduction to Cybersecurity
- Salesforce Certified Agentforce Specialist
- Deloitte | Data Analytics & Cyber & Technology
- Smart India Hackathon | Participated in Smart India Hackathon(2025)
